

LICENSE

This music is licensed by the contributing artists [CC BY-NC-SA](#). Please do read the full linked license, but the TL;DR of this is you can use these songs on non-commercial games only and you MUST include the musician's information in the project description (or in the game itself).

If, in the future, you monetize your project (either through direct sales, or microtransactions, or ad revenue, or any other way), each contributing musician has control over the license for their song. Their contact information is included here. Reach out to them and ask!

WHY ARE THERE MISSING NUMBERS?

Being added to this pack is opt-in from the [Two Hour Album Challenge](#), not every artist wanted to submit their music to this asset pack. This music community is hosted on the Abstractionaut Discord server. You can find other game developers and most of the musicians who participated on here: <https://discord.abstractionmusic.com/>

ARTIST INFO

Below is the contact info for all the musicians who contributed music to this pack. When posting your game on itch, please include the artist, song name, and/or website link.

Once your game is out there, consider reaching out to the artist and sharing! I'm sure they would love to see how the music inspired you.

Remember that the license for the music only extends to non-commercial projects, if you plan on monetizing your project in some way, please get in touch with the musician.

BackspinZX - Malevolent Machine
